## Education

### National Institute Of Technology Jamshedpur

Bachelor of Technology in Mechanical Engineering CGPA-8.78/10

Aug. 2024 – July 2028

Adityapur, Jharkhand

### Vishnu Bhagwan Public School

Class XII-CBSE Percentage-95.8

June. 2021 – May 2023

Prayagraj, Uttar Pradesh

### Vishnu Bhagwan Public School

Class X-CBSE Percentage-94.8

June. 2019 – May 2021

Prayagraj, Uttar Pradesh

## Technical Skills

**Programming Languages:** Python/C/C++/Javascript

**Web Development Tools:** HTML/CSS/ReactJs/NodeJs/ExpressJs/TailwindCSS

**Developer Tools:** VS Code, Google Cloud Platform

**Tools/Platforms:** Git/GitHub

**Databases:** PostgreSQL/MySQL/MongoDB

## Achievements

### Winner, Platinum Jubilee Innovation Challenge – IIT Kharagpur

FinAgent — AI Student Money Co-Pilot

- Won top honors in a flagship entrepreneurship competition with my team by architecting an AI-powered, full-stack money management platform. Developed an intelligent, market-ready solution for the "Campus Wellbeing" track that automates student budgeting and transforms a complex financial problem into a commercially viable product.

## Projects

**EduPortal** | HTML, CSS, ES6+ Js, NodeJs, ExpressJs, MongoDB, Render

<https://amal043.github.io/EduPortal/>

- Developed a responsive Educational Opportunities Portal that helps users discover scholarships, hackathons, workshops, and internships through state-based opportunity recommendations.
- Built a secure authentication system using MongoDB, implementing user registration, login, session handling, and protected access to personalized features.
- Designed and developed a modern, mobile-friendly user interface using HTML5, CSS3, and JavaScript(ES6+), featuring dark/light theme support, glassmorphism effects, and interactive animations.
- Integrated MongoDB for efficient data storage and deployed the application on Render for reliable and scalable hosting.

### Quick.Style

<https://quick-style-ten.vercel.app>

- Developed QuickStyle, a real-time, 30-minute quick-commerce fashion delivery platform utilizing a multi-agent AI system (LangGraph & Vertex AI Gemini) where Stylist and Anti-Return agents negotiate in real-time to recommend highly personalized products with a minimized return risk.
- Integrated a browser-native voice-to-commerce purchase flow, automated outfit completion recommendations, hyperlocal trend intelligence via web scraping (Tavily), and real-time package delivery tracking utilizing the Google Maps and Directions API.
- **Frontend:** React, TypeScript, Vite, Tailwind CSS, Framer Motion, Three.js (@react-three/fiber), Zustand, TanStack Query, Socket.io-client.
- **Backend:** FastAPI, LangGraph, LangChain, Google Vertex AI (Gemini 1.5 Pro & Flash), MongoDB (Motor), Redis, Celery, Elasticsearch, Razorpay, Twilio, FFmpeg.

**Sonoria** | JavaScript, HTML5, CSS3, Node Js, MongoDB

<https://amal043.github.io/Sonoria/>

- It is a modern, premium web-based music streaming platform (similar to Spotify or YouTube Music) designed to give you access to a massive library of songs and music videos.
- It features a seamless one-click switch between audio-only streaming (with a live wave visualizer) and high-quality video playback.
- Users can register accounts to save "Liked" tracks and create custom, persistent playlists synchronized via a secure Node.js and MongoDB backend.
